

ODORx® Bad Odor Block™ FOR PROFESSIONAL USE

Easy-to-use odor counteractant • Place virtually anywhere • Available in a variety of pleasant scents

BACKGROUND

The Bad Odor Block is a simple, convenient method to dispense a deodorizer in virtually any location. The deodorizer is adsorbed onto a natural wicking block and starts dispensing as soon as the package is opened. Because the deodorizer consists of essential oils, be sure to use the block only in areas where contact with oil will not cause damage. The oil might soften or discolor certain paints, for example.

The deodorizer will dispense more rapidly as temperature rises or when air flow increases across the surface of the block.

Bad Odor Blocks are useful in several different areas including:

- Automobiles
- Duct system registers
- Furnace plenums
- Intakes of carpet dryers to control odor during drying process
- Small rooms and closets

INSTRUCTIONS FOR USE

1. Select the location to place the Bad Odor Block and be sure the area is clean. Also be sure that pets and children will not have access to the Block.
2. Place the Bad Odor Block in the area to be treated. Avoid areas where there could be open flames or sources of ignition. Avoid placing the block on surfaces that might be damaged or discolored by oils. These surfaces include painted, varnished and plastic surfaces.
3. To control the amount of deodorant emitted by the block and to extend the life of the block, try these tips:
 - Snip off a corner of the package. Later, when the scent is reduced, cut off a larger portion of the package. Wrap a rubber band around the package to make sure the block doesn't fall out.
 - Poke a few holes in the package to control the release of scent. When the scent is reduced, poke a few more holes in the package.
 - Airflow and temperature influence the amount of scent released. If the deodorizing scent becomes too strong, reposition the block in an area of lower air flow or lower temperature or remove the block.

CLEANUP

When the Bad Odor Block has released all its deodorizer, remove from the area and discard in normal trash.

SAFETY CONSIDERATIONS

- Avoid areas where there could be open flames or sources of ignition.
- Keep children and pets away from your work area and from your equipment.
- Read the SDSs for all products before using them. You can obtain the SDSs from your distributor or from **LegendBrandsRestoration.com**
- Use the personal protective equipment specified in the SDS.
- In case of exposure to the product, call 800-535-5053 for advice.
